ALPHA OF MISSOURI.

Charter Granted the State University by Graduate Society. REPUBLIC SPECIAL.

Columbia, Mo., Oct. 30.—The triennial na-tional council of the Phi Beta Kappa has tranted the University of Missouri a charter, which will be known as the Alpha of Missouri. The Phi Beta Kappa is a learned society dating back to the Revolution. The society originated at William and Mary and the second chapter was organized at

Harvard.

The society is in reality a graduate society and in no sense secret, having nothing to do with the so-called Greek-letter societies. It is recruited from the academic seniors, the students of the highest grade being chosen. At Harvard, where the manseniors, the students of the nignest graupbeing chosen. At Harvard, where the management of the society is most conservative
and where the most famous chapter exists,
one student out of thirty-three is chosen.

The granting of a charter to the University of Missouri is a high compliment.
There were tweive universities applying for
charters, only three of which were successful. Of the present faculty, ten or more
are members of the Phi Beta Kappa, having been elected in other institutions.

MR. W. RICHARDS, Barytone, there are musical instruments of any kind. Application for warrants will be made against these saloonkeepers on charges of violating the State law.

Captain Reynolds held a conference with Assistant Prosecuting Attorney Johnson on the subject and asked if he would act in the matter. Colonel Johnson said that he would not proceed against the saloonkeepers who keep planos in their places unless the rolice would report those in which string instruments and orchestras are in vogue. Captain Reynolds said there would be no distinction made between any classes of music. All would be reported. Colonel Johnson then agreed to act.

Two years ago, when the wineroom crusaders were actively engaged, a crusade was made on the saloons in which music was tolerated, but it came practically to an end when Judge Hirzel, a special Judge on the bench in the Court of Criminal Correction, ruled that the law did not cover stringed instruments, but such instruments as the plano and the organ.

The police do not believe that Judge Clark will rule as Judge Hirzel did, and they hepe to wipe out all kinds of music from the saloons.

Pana, Ill., Oct. 30.-Several Illinois towns claim to be oldest prohibition towns in Illinois. Normal, however, can beat them all and holds the record.

When Normal was first laid out, in 1856, deeds to various lots contained very rigid stipulation that no saloons could be oper-ated upon said lot, that each lot was sold with understanding that no saloons would be operated in town. This agreement was adhered to. As a result, no saloon has ever been operated in borders of that city. The Normal charter was approved by the Legislature on February 25, 1867. This charter contains a very strict temperance clause Since its adoption there has never been a saloon of any kind in Normal, thus giving record of forty-five years as a temperance

MOLINEUX CASE POSTPONED.

Court Will Hear Arguments Next Week-Defendant Protests.

New York, Oct. 30.—The application by counsel for Roland B. Molineux for the dismissal of the indictment charging him with the murder of Mrs. Katherine J. Adams came up before Judge Mahon in the Court of General Sessions to-day.

An application for an adjournment of the argument made by Assistant District Attorney Garvan was denied, the Court saying that the defendant's counsel might present their argument this afternoon and that the District Attorney could then be given time in which to prepare his reply.

Ex-Governor Black of counsel for Molineux, urged that this lindictment be dismissed because illegal evidence was presented to the Grand Jury which found the indictment, and also on the ground that the indictment was found on insufficient evidence.

Control of Underground Stream of Water the Point at Issue.

REPUBLIC SPECIAL Jackson, Miss., Oct. 30.—A strikingly unique and original point of law containing unique and original point of law containing much interest to the general public has just been decided by the Chancery Court of Clarke County.

An injunction was secured by the county restraining a lumber manufacturing company at Quitman from using artificial means in forcing water from its own artesian wells, on the ground that the underground water supply was being depleted by the excessive use, and the flow of water at the Courthouse well, fed from the same underground stream, had been greatly weakened. The Chancellor dissolved the temporary restraining order, whereupon the lumber company brought suit for damages in the sum of \$1,500, and received a verdict for \$500. This establishes a precedent in law, as it is the first case on record where the control of an underground stream of water has ever been brought into question, although there are many court decisions regarding surface streams.
